

Specification for

Structural steel equal and unequal leg angles —

Part 2: Tolerances on shape and dimensions

The European Standard EN 10056-2:1993 has the status of a
British Standard

UDC 669.14.018.29–423.2:621.753.1

Cooperating organizations

The European Committee for Standardization (CEN), under whose supervision this European Standard was prepared, comprises the national standards organizations of the following countries:

Austria	Oesterreichisches Normungsinstitut
Belgium	Institut belge de normalisation
Denmark	Dansk Standardiseringsraad
Finland	Suomen Standardisoimisiito, r.y.
France	Association française de normalisation
Germany	Deutsches Institut für Normung e.V.
Greece	Hellenic Organization for Standardization
Iceland	Technological Institute of Iceland
Ireland	National Standards Authority of Ireland
Italy	Ente Nazionale Italiano di Unificazione
Luxembourg	Inspection du Travail et des Mines
Netherlands	Nederlands Normalisatie-instituut
Norway	Norges Standardiseringsforbund
Portugal	Instituto Português da Qualidade
Spain	Asociación Española de Normalización y Certificación
Sweden	Standardiseringskommissionen i Sverige
Switzerland	Association suisse de normalisation
United Kingdom	British Standards Institution

This British Standard, having been prepared under the direction of the Iron and Steel Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 December 1993

National foreword

This British Standard has been prepared under the direction of the Iron and Steel Standards Policy Committee and is the English language version of EN 10056-2:1992 *Structural steel equal and unequal leg angles — Part 2: Tolerances on shape and dimensions*, published by the European Committee for Standardization (CEN). It supersedes the requirements for tolerances given in clause 3 of BS 4848-4:1972 which are withdrawn by amendment.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 6, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

UDC 669.14.018.29-423.2:621.753.1

Descriptors: Iron and steel products, angle irons, structural steels, dimensional tolerances, form tolerances

English version

Structural steel equal and unequal leg angles Part 2: Tolerances on shape and dimensions

Cornières à ailes égales et à ailes inégales en
acier de construction
Partie 2: Tolérances de formes et de
dimensions

Gleichschenklige und ungleichschenklige
Winkel aus Stahl
Teil 2: Grenzabmaße und Formtoleranzen

This European Standard was approved by CEN on 1993-08-30. CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Comité Européen de Normalisation
Europäisches Komitee für Normung

Central Secretariat: rue de Stassart 36, B-1050 Brussels

Foreword

This Part of this European Standard has been prepared by ECISS/TC 11 Sections: Tolerances and dimensions, the Secretariat of which is held by BSI. The discussions within ECISS/TC 11 were based on Euronorm 56 : 77 *Hot rolled equal angles (with radiused root and toes)* and Euronorm 57–78 *Hot rolled unequal angles (with radiused root and toes)*. This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at least by March 1994, and conflicting national standards shall be withdrawn at the latest by March 1994. According to the CEN/CENELEC Internal Regulations, the following countries are bound to implement this European Standard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom.

Table 1 — Tolerances on dimensions, squareness and straightness of structural steel equal and unequal leg angles	4

1 Scope

This Part of this European Standard specifies tolerances on shape dimensions and mass of hot-rolled structural steel equal and unequal leg angles. The sizes of these angles are given in EN 10056-1. These tolerances do not apply to equal and unequal leg angles produced from stainless steel.

NOTE Until EN 10056-1 is published, either Euronorms 56 and 57 or the corresponding national standards may be used.

2 Normative references

This Part of this European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies. EN 10056-1, *Structural steel equal and unequal leg angles — Tolerances on shape and dimensions (under preparation)*.

EN 10079:1992, *Definition of steel products*.

Euronorm 56 (1977), *Hot rolled equal angles (with radiused root and toes)*.

Euronorm 57 (1978), *Hot rolled unequal angles (with radiused root and toes)*.

3 Definitions

For the purposes of this European Standard the definitions in EN 10079 apply.

4 Tolerances on shape and dimensions

4.1 Leg length (a or b)

The deviation from nominal on leg length shall be within the tolerance given in Table 1.

For unequal leg angles, the longer leg length (a) shall be used to determine the tolerance band.

4.2 Section thickness (t)

The deviation from nominal on thickness shall be within the tolerances given in Table 1.

4.3 Out-of-square (k)

Out-of-squareness of the section shall not exceed the maximum given in Table 1.

For unequal leg angles, the longer leg length (a) shall be used to determine the tolerance band.

4.4 Straightness (q)

The deviation from straightness shall not exceed the tolerances given in Table 1.

For unequal leg angles, the longer leg length (a) shall be used to determine the tolerance band.

5 Tolerance on mass

The deviation from the nominal mass of any individual piece shall not exceed:

- a) $\pm 6\%$ for thicknesses for $t \leq 4$ mm; or
- b) $\pm 4\%$ for thicknesses for $t > 4$ mm.

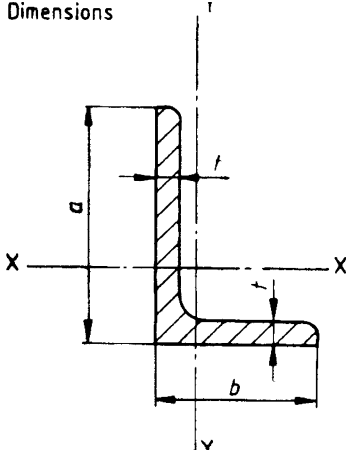

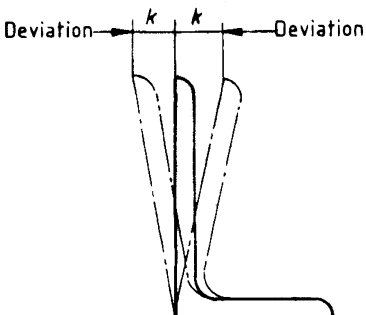

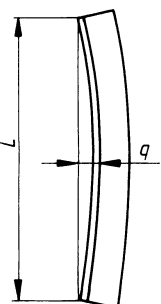

The deviation from the nominal mass is the difference between the actual mass of the piece and the calculated mass. The calculated mass shall be determined using a density of $7,85 \text{ kg/dm}^3$.

6 Tolerance on length

The tolerance on ordered length shall be either.

- a) ± 50 mm; or
- b) $+\frac{100}{0}$ where minimum lengths are required.

Table 1 — Tolerances on dimensions, squareness and straightness of structural steel equal and unequal leg angles

Dimensions	Leg length		Section thickness		
	Length mm	Tolerance mm	Thickness (<i>t</i>) mm	Tolerance mm	
	<i>a</i> ≤ 50 50 < <i>a</i> ≤ 100 100 < <i>a</i> ≤ 150 150 < <i>a</i> ≤ 200 200 < <i>a</i>	± 1.0 ± 2.0 ± 3.0 ± 4.0 + 6.0 − 4.0	<i>t</i> ≤ 5 5 < <i>t</i> ≤ 10 10 < <i>t</i> ≤ 15 15 ≤ <i>t</i>	± 0.50 ± 0.75 ± 1.00 ± 1.20	
					
Squareness	Out-of-square		Tolerance		
	Leg length (<i>a</i>) mm		(k) mm		
	<i>a</i> ≤ 100 100 < <i>a</i> ≤ 150 150 < <i>a</i> ≤ 200 200 < <i>a</i>		1.0 1.5 2.0 3.0		
					
Straightness	Leg length	Tolerance over full bar length	Leg length	Tolerance over any part	
	<i>a</i> mm	<i>q</i> mm	<i>a</i> mm	Length considered mm	<i>q</i> mm
	<i>a</i> ≤ 150 150 < <i>a</i> ≤ 200 200 < <i>a</i>	0.4 % <i>L</i> 0.2 % <i>L</i> 0.1 % <i>L</i>	<i>a</i> ≤ 150 150 < <i>a</i> ≤ 200 200 < <i>a</i>	1 500 2 000 3 000	6 3 3
					

Annex A (informative)

Straightness measurement

Straightness measurement requires a reference straight edge from which deviations in section straightness are measured. A taut string line is an acceptable straight edge provided that deviations in the horizontal plane only are measured.

Measurement is carried out as follows. The angle is placed on one leg on a flat surface and the string is taken along the toe of the other leg of the unconstrained angle for the length under consideration.

National annex NA (informative)
Committees responsible

The United Kingdom participation in the preparation of this European Standard was entrusted by the Iron and Steel Standards Policy Committee (ISM/-) to Technical Committee ISM/13, upon which the following bodies were represented:

BEAMA Ltd.

British Constructional Steelwork Association Ltd.

British Steel Industry

National Association of Steel Stockholders

National annex NB (informative)

BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover. Tel: 020 8996 9000. Fax: 020 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: 020 8996 9001. Fax: 020 8996 7001.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre. Tel: 020 8996 7111. Fax: 020 8996 7048.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration. Tel: 020 8996 7002. Fax: 020 8996 7001.

Copyright

Copyright subsists in all BSI publications. BSI also holds the copyright, in the UK, of the publications of the international standardization bodies. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.

This does not preclude the free use, in the course of implementing the standard, of necessary details such as symbols, and size, type or grade designations. If these details are to be used for any other purpose than implementation then the prior written permission of BSI must be obtained.

If permission is granted, the terms may include royalty payments or a licensing agreement. Details and advice can be obtained from the Copyright Manager. Tel: 020 8996 7070.
